

Weather Front

Winter 2021/1921

Winter 2021.

Observers Notes.

Mountsorrel: The coldest winter since 2012/13.

Derby: A winter rainfall total of 285.8 mm was just 0.1 % more than that for the winter of 2019/20! Very unusual to get two very wet winters in succession, although the distribution was very different.

Mickleover: Wettest winter since 1990, and the second wettest on record.

Ely: A total of 259.4 mm of rain for the winter is the highest in 50 years of records, and temperatures for the season were about 0.4 C below average.

Lowdham: Rainfall of 286.6 mm (177% on the 1991-20 average), made winter 2021 the third wettest in the local Nottingham area since 1867, but behind 1977 and 1869.
