EMPOWER

3 1-year Science Engagement Fellowships
sponsored

187 members who are accredited
Registered or Chartered Meteorologists

6 new Society Awards implemented

100% renewable energy using heating
and cooling system installed at HQ

Educating the Next Generation

We commissioned the very **first climate literacy survey** of school leavers in Great Britain. This will enable us to monitor changing climate literacy over the coming years.

Supporting Industry and Careers

We developed **3 new Special Interest Groups** to engage and support people working in insurance and energy, and those in their early careers. The Energy SIG attracted 176 attendees to its first virtual event, 'Seasonal forecasts and their use in the energy sector'.

Responding to Climate Change

We hosted a Climate Change Forum to explore a vision for climate change in 2050. **Over 70 individuals attended** and a summary of outcomes was submitted to the Government's Net Zero Review.

Contributing to COP

We attended COP27 and built a learning portal with over **70 resources** for the new African Regional Meteorological Society.
